SUMMARY

MCA graduate from Andhra University (CGPA 8.5) specializing in Python, Machine Learning, and full-stack development. Built AI-powered desktop and web applications with real-time gesture recognition and ML-based career prediction. Seeking an entry-level role in AI/ML or software development.

SKILLS

Programming languages	Python, SQL
AI & Machine Learning	Scikit-learn, OpenCV, Pandas, NumPy, Machine Learning, Deep Learning, Natural Language Processing (NLP), Basic Generative AI (Prompt Engineering, Vertex AI)
Core CS Concepts	Data Structures and Algorithms (DSA)
web development	HTML, CSS and JavaScript, Flask, REST APIs, Streamlit
Databases	MySQL
Tools	GitHub, Jupyter Notebook, VS Code, Google Colab

PROJECTS

Project Title: G.A.I.A (GESTURAL AND AUDITORY INTELLIGENT ASSISTANT)

Team Size: 1 **Duration:** 5 Months

Description:

Gestural and Auditory Intelligent Assistant is an AI-Powered desktop assistant that responds to both Voice Commands and hand gestures for seamless control.

Responsibilities:

- Built an AI desktop assistant in Python supporting 15+ system automation tasks with voice and gesture input, achieving average response time under 2 seconds.
- Implemented rule-based logic for decision-making, enhancing system reliability and accuracy in gesture recognition.
- Designed and validated 3 independent modules - speech processing, gesture recognition, and real-time automation - with rule-based decision logic improving recognition accuracy.

Environment:

- Languages: Python
- Libraries & Tools: OpenCV, Pyttsx3, SpeechRecognition, Pandas, NumPy, Matplotlib
- Platforms: Jupyter Notebook, VS Code

Mini Project Title: AI-Powered Resume Analyzer and Skill Recommendation System

Team Size: 1 **Duration:** Mini Project

Description:

An AI and NLP-based web application that analyzes resumes, predicts suitable job roles, extracts skills, and recommends relevant skills for career improvement.

Responsibilities:

- Developed an AI-powered Resume Analyzer using Python, Natural Language Processing (NLP), and Machine Learning techniques to predict suitable job roles from resume data.
- Implemented PDF resume parsing and automated skill extraction using text processing techniques and a predefined skills database.
- Built a TF-IDF feature extraction pipeline and trained Machine Learning classification models using Scikit-learn for accurate resume classification.
- Designed and deployed an interactive Streamlit-based web application that provides job role prediction, skill analysis, and skill recommendations for career enhancement.

Environment:

- Languages: Python
- Libraries & Tools: Scikit-learn, Pandas, NumPy, PDFPlumber, Pickle
- Frameworks: Streamlit
- Platforms: VS Code, Jupyter notebook

CERTIFICATIONS

Artificial Intelligence & Machine Learning – 3 Month Training Program

- Built a Passenger Survival Prediction model using Logistic Regression, Random Forest, and Decision Trees, achieving 80% accuracy.

Prompt Design in Vertex AI – Google Cloud Skill Badge

- Applied prompt engineering techniques within Google Cloud’s Vertex AI for AI and ML solutions.

EDUCATION

Master of Computer Applications , Andhra University	CGPA: 8.5	2023 - 2025
Bachelor of Computer Science , Prism Degree College	CGPA: 8.0	2021 - 2023
Board of Intermediate AP , Narayana Junior College	CGPA: 9.0	2018 - 2020
Secondary School Certificate , Narayana School	CGPA: 10.0	2017 - 2018
